**Internet Services
RFP#200-25-15**

ADDENDUM NO.2

This addendum issued October 27, 2015 becomes in its entirety a part of the Request for Proposals RFP#200-25-15 as is fully set forth herein:

Item 1: Q: Is it possible to be provided with a network diagram of the current solution that is in place?

A: Our current configuration is simple. Each community or administrative office is connected in a star configuration to a network hub operated by the vendor managing our fiber optic network. All connections except the connection at 200 Ross Street are 1Gb fiber connections. The connection to 200 Ross Street is a 10Gb fiber connection. At the star hub our ISP has located a firewall and provides a 20Mb connection to the internet.

Item 2: Q: Under the VPN section of the RFP, it says "Vendor should provide configuration able to support up to 10 site to site VPN tunnels for use by outside agencies and special project." Can you tell me what type of firewalls these 'outside agencies' have? Or if we would be providing this firewall for them?

A.: Vendor will be expected to provide a VPN connection based on industry standards. The HACP will then publish the vendor connection requirements and outside agencies will be expected to connect using the published standard.

Item 3: The proposal due date, time and location remain unchanged at November 6, 2015 at 10 am, at the HACP Procurement Dept., 100 Ross St. 2nd Floor, Suite 200, Pittsburgh, PA 15219.

END OF ADDENDUM NO. 2
