Purchase of Lock cores and Key blanks IFB#300-33-11 Rebid

ADDENDUM NO.2

This addendum issued October 3, 2011 becomes in its entirety a part of the Invitation for Bids IFB#300-33-11 Rebid as is fully set forth herein:

Item 1: Q: Please considered PDQ as an equal to the Falcon cores. A cut sheet is attached. (attachment A to this addendum)

A: PDQ parts are not compatible and as such PDQ is not an acceptable equal/equivalent.

Item 2: The Bid due date, is revised to October 10, 2011. The time and location remain unchanged at 2:00 p.m., at HACP Procurement Dept., 100 Ross St. 2nd Floor, Suite 200, Pittsburgh, PA 15219.

END OF ADDENDUM NO. 2

William D. McDanel
Contracting Officer

10/3/2011
Date

9/14/11

To Whom It May Concern:

Specifically regarding the IFB # 300-33-11 released by Pittsburg Housing Authority for the furnishing of 5000 Key blanks in the Falcon F2 keyway and 1000 6 pin I/C cores also in the Falcon F2 keyway. The technical specification had mandated that these cores arrive without pinning, being said what is being requested is the Falcon F keyway, the "2" in F2 represents an A2 master key system, however granted that these cores will be unpinned, there is no master key system to consider. The PDQ F I/C keyway in consideration is the exact same keyway as the Falcon F I/C keyway.

If there is any question in the approval of this as a substitute, please contact me and I would be happy to discuss your concerns.

With Best Regards,

PDQ Manufacturing

PDQ Interchangeable Cores COMMERCIAL

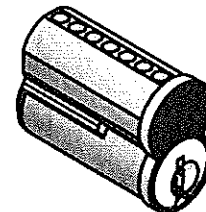

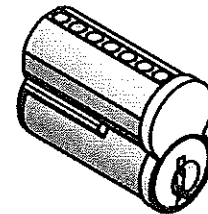

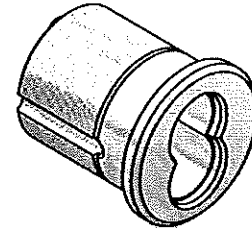

Along with our conventional cylinders, PDQ offers a variety of interchangeable cores in Small Format (SFIC). PDQ also offers a compatible lever that will accommodate Schlage® Large Format IC. Our highly skilled keying personal can design a keying system from a simple master key, to a complex system featuring, Master and Grand Master keys using the A2, A3 and A4 Systems. Along with designing new

keying systems, PDQ can add to an existing system provided proper records are presented. In addition, PDQ offers both plastic and regular construction cores for use while work is in progress. This protects the integrity of the keying system while allowing use of the locks that are installed. The plastic construction cores are disposable, while standard construction cores can be returned for partial credit.

PDQ Interchangeable Cores KEYWAYS:

Best A	WA	PDQ 1 (not restricted)
Best B	WB	PDQ 2 (not restricted)
Best C	WC	PDQ 3 (restricted)

PDQ INTERCHANGEABLE CORES

CONSTRUCTION CORES

Temporary Construction Cores: Another more secure way to ensure the security of the construction site is the use of temporary cores. PDQ offers both standard and disposable construction cores for this purpose. The standard cores have a black dot on the upper pin chamber identifying them as construction cores. These can be returned at job's end for a partial credit. Disposable cores are not key lockable and are discarded when the job is complete.
