## SALT STORAGE BUILDING

Quotes due December 30, 2014 @ 10:00 a.m.

Fax to Debbie Norkevicus at (412) 456-5007

### Scope of Work

Facility Services requested a Salt Storage building large enough to accommodate 250 tons of salt to be stored at Northview Heights site.

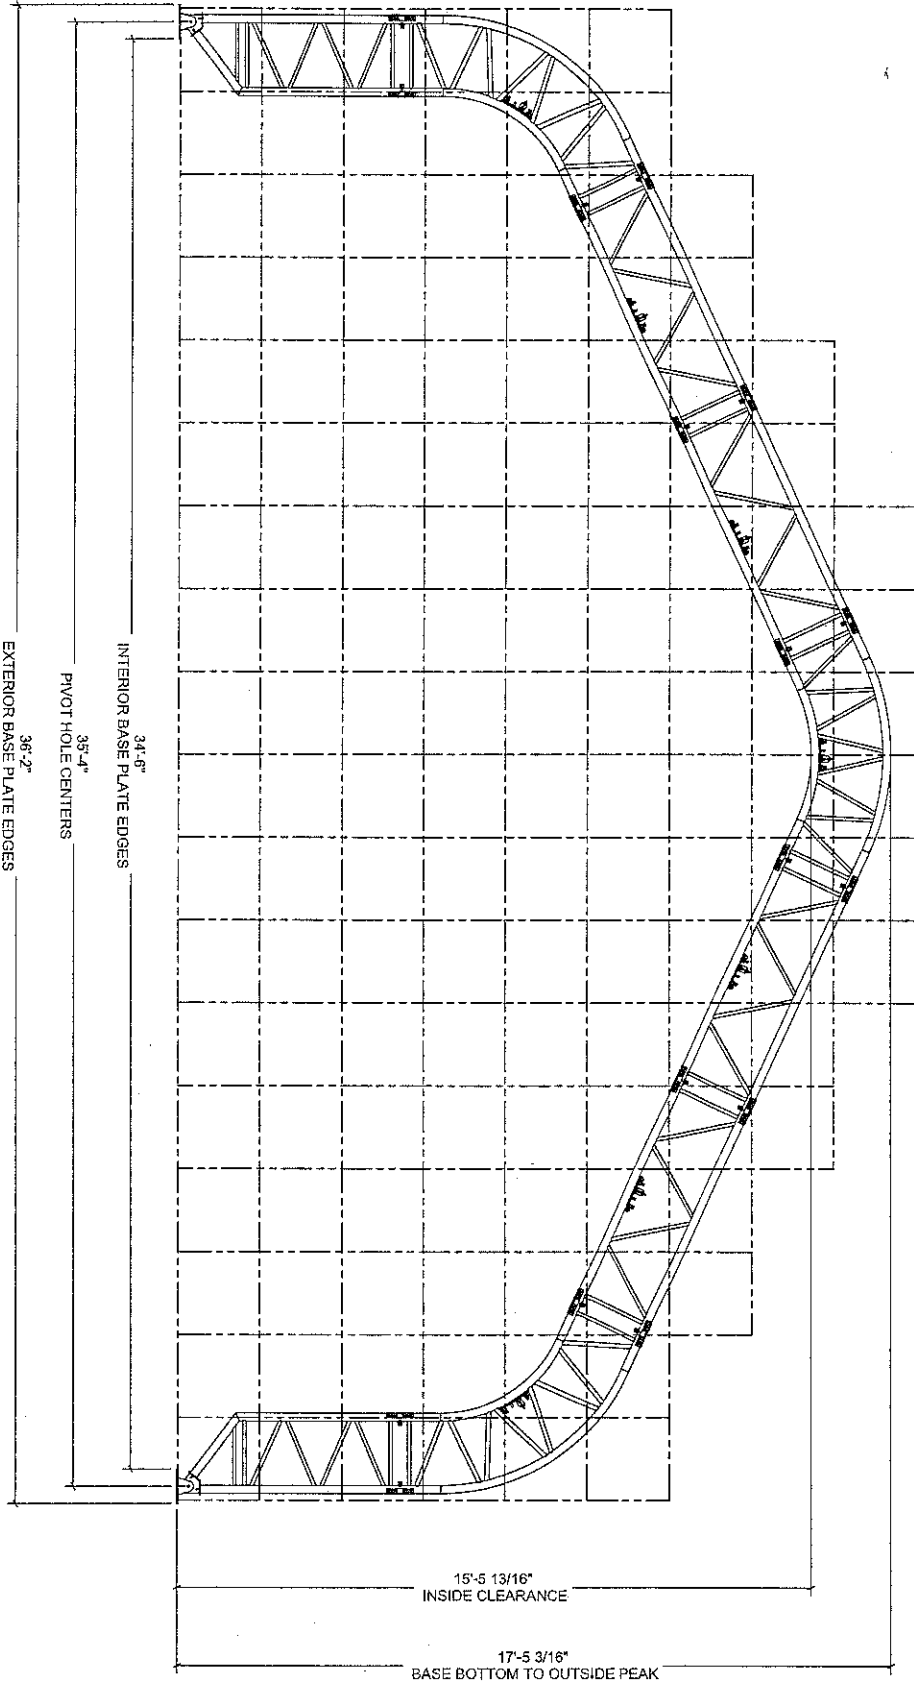

A foundation/base has been constructed to accommodate a hoop style building to protect the stored salt from rain and snow. The base is made of concrete retaining wall blocks measuring 2(two) feet wide by 6 (six) feet long. The blocks are stacked 4 (four) high creating a wall 8 (eight) feet tall. The blocks are laid out in a rectangle with one open end. **The side walls measure 36 feet 2 inches apart at the outside edge (34 feet 2 inches apart on the inside edge) and 42 feet long.**

A Clear Span (or equal) fabric hoop/gable building will be mounted to the top of the blocks to shield the interior from the weather.

The structure will have:

- Minimum 34 feet wide by 40 feet long and 15 feet high at its inside peak.
- Metal truss frames (as opposed to a mono steel tube).
- Trusses must be galvanized steel.
- Trusses spaced maximum 20 feet on center (3 trusses).
- Frame to have minimum 15 year warranty.
- Mounting plates shall be able to be securely bolted to the top of the retaining wall within the dimensions specified above.
- Include all hardware mounting plates and all bolts.
- Cover/Fabric to be a minimum 12.5 oz. 24 mils polyethylene.
- Cover/Fabric must be UV and rip resistant.
- Cover/Fabric to have minimum 15 year warranty.
- Include one solid end panel (**no door opening**) and all hardware and materials necessary to attach it to the main structure.

Please contact Debbie Norkevicus at 412.456-5000 ext 8505 or at [Debbie.Norkevicus@HACP.org](mailto:Debbie.Norkevicus@HACP.org) with any questions about the above scope
