Scope of Work

Technical Assistance to Revise and Update Surveillance Camera System Maintenance Services Scope of Services and Request for Proposals

The Housing Authority of the City of Pittsburgh owns and operates a networked Camera Surveillance System that includes approximately 800 video surveillance cameras linked to the HACP's computer system and a central monitoring and recording location. The system includes wired and wireless connectivity, multiple servers, and specialized software. Wireless access to video feeds and remote control of cameras with pan and zoom capability are also provided. Maintenance, troubleshooting, repair and replacement as needed of the cameras, servers, software and some cabling are provided through a contracted vendor, and the current contract is nearing its expiration date. The Housing Authority of the City of Pittsburgh is required to competitively procure these services. The previously utilized Request for Proposals, and the contract Scope of Services, are now nearly 5 years old.

HACP is seeking proposals from qualified firms to provide technical assistance in updating the Scope of Services and the Request for Proposals to reflect the current state of technology for Camera Surveillance systems, connectivity, hardware, software, and other required elements for an effective and reliable surveillance camera system.

Please contact Debbie Norkevicus at 412-456-5000 ext. 8505 or at Debbie.Norkevicus@HACP.org with any questions about the above scope.
