2020 Revised Flat Rent Schedule  
Effective 2-1-20

Factors considered when establishing flat rents:

1. Location - Scattered sites - single family, duplex, or part of a row, are generally more desirable and demand higher rents than units in high density housing developments. This contributes to higher base flat rent for scattered sites than for traditional sites.
2. Quality - at this time, HACP has not made flat rent schedule adjustments based upon housing quality, as all units meet UPCS standards.
3. Size - HACP provides different flat rent levels based upon number of bedrooms.
4. Unit Type - generally single family, duplex and row houses in a row of largely owners are of a more desirable type than the apartment or garden type units available on other HACP owned and operated properties, contributing to the higher base flat rent for scattered sites.
5. Age - As all of HACP's units (with a few exceptions in the case of accessible units) are more than 30 years old, no adjustment is made to the flat rent schedule for this factor.
6. Amenities - Amenities at HACP properties vary significantly, but none are such as to add significantly to the value of the unit (such as pools, gym facilities, etc.) and therefore no adjustments to the base flat rents are made.
7. Services provided or available - like amenities, the services available at HACP properties vary significantly, but none are such as to add significantly to the value of the unit and therefore no adjustments to the base flat rents are made.
8. Utilities provided - HUD Notice directs housing authorities to modify flat rents to take into account tenant paid utility costs, and HACP has made appropriate adjustments.

New Flat Rents will take effect February 1, 2020.
